U.S. Patent Application of: David Philips et al.
Application No. 09/801,089
Filed: March 8, 2001
Group Art Unit: 1644
Examiner: Gerald Ewoldt
Title: Modulation of Integrin-Mediated Signal Transduction

Please deliver this facsimile transmission to Examiner Gerald Ewoldt.

As we discussed in our telephone conversation on 6 January 2003 attached are copies of the documents filed with the U.S. Patent Office on 6 June 2002 which apparently were never entered in this application. Could you please see that the attached preliminary amendment and substitute sequence listing are entered. We believe that following their entry, all of the requirements for applications containing nucleotide and amino acid sequences will be met and that the notice from the Examiner issued on 19 December 2003 will be moot.
